

DECADE

SELF-PRIMING URETHANE

DECADE Self-Priming Polyurethane Enamel is a two-component coating providing gloss, excellent durability and resistance properties, along with an extremely low VOC of less than 100 grams per liter, 0.8 pounds per gallon.

- ▼ **Excellent gloss, hardness and impact resistance.**
- ▼ **Excellent mar and abrasion resistance.**
- ▼ **Excellent exterior physical and chemical performance properties.**
- ▼ **Fast one coat build.**

DECADE is the new corrosion resistant self-priming polyurethane enamel setting new standards for ease of use, durability and VOC compliance. DECADE offers a one coat application for both the priming and finish coat and provides excellent hardness, mar and abrasion resistance with superior color and gloss retention while providing tough protection against corrosion, chemical, and solvent attack. DECADE is formulated at a super low VOC and is lead and chromate free. This breakthrough formula results in cutting production time saving hours of application time for each project.

DECADE is a versatile coating that is the best choice for a wide range of products, resulting in greater field performance. DECADE is formulated at a VOC of less than 100 grams per liter, 0.8 pounds per gallon, for improved air quality, greater plant safety and reduced hazardous waste generation - for a healthier and cleaner work environment.

**Available in Black, White, Tint Bases and Select Safety Colors.
Mix 4:1 with Part B (DX-8599 Catalyst)**

Available in gallon kits. Gallon kits include Catalyst.
